Phishing Websites Data Set

Download: Data Folder, Data Set Description

Abstract: This dataset collected mainly from: PhishTank archive, MillerSmiles archive, Google's searching operators.

Data Set Characteristics:	N/A	Number of Instances:	2456	Area:	Computer Security	
Attribute Characteristics:	Integer	Number of Attributes:	30	Date Donated	2015-03-26	
Associated Tasks:	Classification	Missing Values?	N/A	Number of Web Hits:	98877

Data Set Information:

One of the challenges faced by our research was the unavailability of reliable training datasets. In fact this challenge faces any researcher in the field. However, although plenty of articles about predicting phishing websites have been disseminated these days, no reliable training dataset has been published publically, may be because there is no agreement in literature on the definitive features that characterize phishing webpages, hence it is difficult to shape a dataset that covers all possible features.

In this dataset, we shed light on the important features that have proved to be sound and effective in predicting phishing websites. In addition, we propose some new features.
